All redundancies and potentials must be disposed of in accordance with Agency guidelines. This ensures that we can continue to use TimeFax to protect our communities, and better the lives of future generations.

Aster works for the Agency, a private police force that uses time travel to stop crimes before they happen. Unlike most operatives, Aster and her sister Isadora can time travel without a TimeFax machine. Which would be pretty great... except that everyone, even Aster's own clone, keeps lying to her.

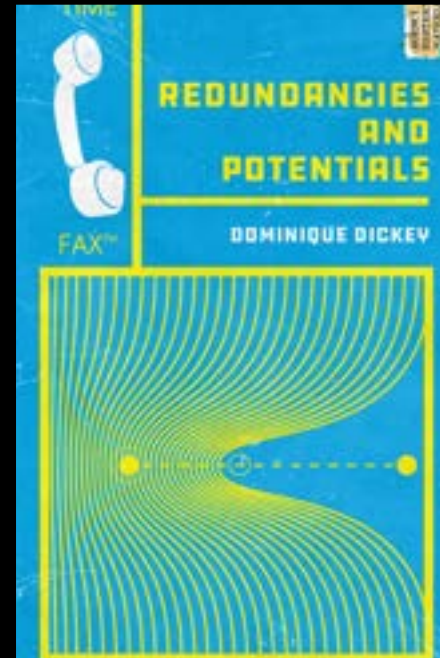

As everything she's believed about the Agency and her life starts to unravel, Aster has to decide who to trust, if the Agency is worth saving—and whether she really wants to see the whole timeline.

An ancient Roman temple terraforming Mars. An android longing for his human wife. Will their epic clash bring Earth to its knees?

Android Y1 is heartbroken. He was once a neuroscientist who uploaded his own brain to study it. Now he hates watching his human self take his wife and son for granted while he's cut off from his loved ones. And just when he's ready to end it all, his secret lab—home to the only artificial brains in existence—is sold to the high priestess of a Roman temple focused on using them as forced labor in a Martian settlement.

With his android friends facing a grim future, Y1 reluctantly becomes their leader as religious fanatics and greedy investors play with their lives behind the scenes. But when they rise up for freedom, Y1 watches in horror as the high priestess takes his vulnerable human son hostage. Trapped and racing against time, he must find a way to rescue his son and save his wife from the unthinkable—while keeping the androids safe.

Living in a post-climate-disaster world protected by a layer of artificial cloud, Mallory knows every shade of darkness, their world lit sparingly by bioluminescence. But when Rein stumbles across their path—radioactive light bleeding from their teeth, their skin twisted and burned—Mallory’s worldview implodes, and the true cost of their survival becomes all too clear.

A haunting cli-fi novella ideal for fans of Tiffany Morris and Stephanie Feldman, EVERY DARK CLOUD combines a dystopian setting and class-conscious narrative with a glimmer of hope for our shared humanity.

Elma York, the Lady Astronaut, lands on the Red Planet, optimistic about preparing for the first true wave of inhabitants. The mission objective is more than just building the infrastructure of a habitat—they are trying to preserve the many cultures and nuances of life on Earth without importing the hate.

But from the moment she arrives, something is off.

In "Hound of the Gods", a fixer in Caesarean Rome investigates the theft of one of the Sybilline Scrolls.

Excerpt:

Four years ago, I stood with Pompey's bodyguard and covered his retreat from Pharsalus, while Caesar's legions cut the rest of his army to bits. I was one of the few who walked away from that bloody field. Pompey escaped, too, but he lost his life a month later to an assassin's dagger in Egypt.

Having served one of the Triumvirs and fought another, now I made my living picking up after the third, Crassus. His days as a builder and fireman had left Rome dotted with substandard apartment buildings. At least he, unlike Pompey, had left me a living, of a sort...

The Nightmare Quest of April May

By Rosemary Jones

**Author
Spotlight
Interview**

TELL US ABOUT YOUR RELEASE THIS MONTH: BRAND NEW OR RE-RELEASE? STAND-ALONE OR SERIES?

The Nightmare Quest of April May marks the start of a new series in Arkham Horror for me and stakes out a slightly different corner of this 1920s supernatural world based on Fantasy Flight Games. After three books loosely tied together following a silent film crew and friends in Arkham and surroundings for Aconyte, I was asked to write a novel specifically tied to the events in the game release *Drowned City* by Fantasy Flight.

However this novel is also a stand-alone historical fantasy set in 1920s America that does not require you to know anything about the game or its characters. You'll find out why Arkham is a very odd city along with April and her friends.

Of course, if you play the game, you might spot certain clues as to what is going on before April. Also, if you love the 1920s and the pulp magazine fiction of the time (I collect it), you'll also catch some fun references before Dr. Carolyn Fern figures it out.

WHAT'S UP NEXT FOR YOU, AND WHERE CAN FANS LEARN MORE ABOUT YOUR WORK? ANY BOOK EVENTS COMING SOON?

I'll be a pro guest at Norwescon and talking about writing fiction based on IPs (intellectual property) with one of Aconyte's editors on Easter Sunday. There are other panels and book signings at the convention as well. Then Worldcon is coming to my home town in August, so I hope to meet up with people there. There are a couple of online conventions also looming in the near future.

As details become available, I post them at rosemaryjones.com or on my social media feeds.

April May knows that she has the worst job at the Arkham Advertiser. She spends all day listening to complaints and taking down classified advertisements for lost dogs! Luckily she has the pulp magazines for entertainment and plans for an European tour with her best friend.

But when her friend succumbs to the mysterious sleep plaguing the rest of Arkham, April realizes the city is dreaming about something monstrous. Meanwhile it has been raining for days and the Miskatonic River is rising to dangerous levels. Under cover of these apparently unrelated disasters, shadowy forces make their own preparations.

With the aid of psychologist Carolyn Fern and Professor Harvey Walters, April May must venture into the strange realms of the Dreamlands, where a man in a golden mask holds the key to rousing the city from its collective nightmare. But for Arkham, the waters continue to rise, and it's closer than ever to the manifestation of something that no one can wake from.
